Activity 04 - Audience and Objective Design for GreenLoop Logistics

Course: Mastering the Art of Communication to Enhance Team Collaboration and Customer Satisfaction

Course Code: TGS-2023037467

Alignment: K3, K4, A2, A3

Version: v10.1 | 17 August 2026

Detailed role-play playbook

Preparation - 10 minutes

1. Read the scenario and your confidential role card.
2. Mark facts, assumptions, emotions, interests, and non-negotiable constraints.
3. Define the shared purpose and the communication outcome you want.
4. Choose the first phrase you will use and the evidence you will listen for.

Round 1 - baseline

1. Analyse the workforce and channel data for implications.
2. Segment audiences by impact, influence, belief, and information need.
3. Write one measurable behaviour objective for each priority audience.
4. Identify objections, proof needs, and trusted messengers.
5. Create an audience-message alignment map.
6. Peer-review objectives for observability and realistic timing.

Observer coaching - 7 minutes

- Record exact language and observable behaviour, not personality judgements.
- Identify one strength, one meaning gap, and one alternative phrase.
- Check clarity, listening, tone, channel, ownership, and follow-up.

Round 2 - deliberate practice

1. Repeat the decision moment with the coached alternative.
2. Confirm shared meaning, action, owner, timing, and escalation.
3. End only when every role can state the same decision in their own words.

Debrief

1. Which statistic materially changes the plan?
2. Who can block adoption despite low formal authority?
3. What behaviour—not awareness—must each audience demonstrate?
4. How will you know understanding is genuine?
