Activity 04 - Audience and Objective Design for GreenLoop Logistics

Course: Mastering the Art of Communication to Enhance Team Collaboration and Customer Satisfaction

Course Code: TGS-2023037467

Alignment: K3, K4, A2, A3

Version: v10.1 | 17 August 2026

Scenario

GreenLoop Logistics is introducing route-optimisation software that changes driver schedules and customer delivery windows. Union representatives worry about workload, dispatchers fear losing autonomy, drivers want practical support, and key customers want reliability. Engagement data shows lower trust among night-shift employees and higher mobile usage than email readership.

Role cards

Role 1: Change communication lead

Represent this stakeholder's legitimate needs, constraints, risks, and preferred outcome. Do not disclose private role assumptions until the debrief.

Role 2: Operations sponsor

Represent this stakeholder's legitimate needs, constraints, risks, and preferred outcome. Do not disclose private role assumptions until the debrief.

Role 3: Driver representative

Represent this stakeholder's legitimate needs, constraints, risks, and preferred outcome. Do not disclose private role assumptions until the debrief.

Role 4: Customer-account lead

Represent this stakeholder's legitimate needs, constraints, risks, and preferred outcome. Do not disclose private role assumptions until the debrief.

Role 5: Measurement lead

Represent this stakeholder's legitimate needs, constraints, risks, and preferred outcome. Do not disclose private role assumptions until the debrief.

Scenario questions

1. Which statistic materially changes the plan?
2. Who can block adoption despite low formal authority?
3. What behaviour—not awareness—must each audience demonstrate?
4. How will you know understanding is genuine?
